- Meets compliance: OSHA 1926.501(b)(1)
- Product weight: 200 lbs.

The Galvanized Warning Line System by Tie Down Safety offers a complete, out of the box roof warning line system solution. The galvanized system offers easy and simple installation that is ready to use in minutes. It includes four 24" platforms with handles for easy carrying on the job site and four 36" vertical line tubes that hold the warning line. This kit also includes 100' of warning pennants and the hot dipped galvanized coating ensures a corrosion-resistant system, especially against rough construction conditions. The Galvanized Warning Line System offers durability, ease of use, and a quick set-up. Tie Down Safety maintains high standards and quality control through quality raw materials and components made in the USA.
