

KEY FEATURES

- Industrial grade aluminum
- Fits roof pitches up to a 6/12 pitch
- Includes safety chains for additional security
- Slip resistant
- Non-corrosive
- Product weight: 9 lbs.

Tie Down Safety's Residential Ladder Dock provides a safe access point for ladders on the roof edge of a building. This accessory drastically improves the overall safety of your workers and is considered a best practice when ladders are being used. The Residential Ladder Dock allows safe entry onto the roof and protects the roof from damage caused by ladders resting on eaves and roof edges. The Residential Ladder Dock is made of strong, industrial grade aluminum, and is compatible with most ladders. This ladder tie off is slip resistant and includes safety chains for additional security. The Tie Down Safety Residential Ladder Dock can be used on a variety of roof pitches up to a 6/12 pitch.
